Certified in Production and Inventory Management

Since 1973, the CPIM program has educated more than 90,000 manufacturing professionals on essential terminology, concepts, and strategies related to demand management, procurement and supplier planning, material requirements planning, capacity requirements planning, sales and operations planning, master scheduling, performance measurements, supplier relationships, quality control, and continuous improvement.

Benefits of CPIM

A CPIM education can help you to:

- Increase your functional knowledge of production and inventory management.
- Improve efficiency across the processes of your organization's supply chain.
- Streamline operations through accurate forecasting.
- Predict outcomes more accurately.
- Maximize customer satisfaction by delivering products and services Just-in-Time.
- Increase profitability by optimizing your organization's inventory investment.
- Enhance your credibility among peers, employers, and customers.

Basics of Supply Chain Management

The basic concepts in managing the complete flow of materials in a supply chain from suppliers to customers are covered in the Basics module. Supply chain concepts are introduced and basic terminology emphasized, as are relationships among activities in the supply chain.

- Introduction to Supply Chain Management
- Demand Management and Forecasting Techniques
- Priority and capacity planning at the Master Planning, MRP and PAC levels
- Aggregate and Item Inventory Management
- Purchasing and Physical Distribution
- Lean/JIT, Quality Systems and Theory of Constraints

Class Materials Provided:

Basics of Supply Chain Management Participants Guide and Practice Questions CD Included (APICS Stock# 09122)

Participant guides supporting CPIM courseware are not intended for self-guided study, but are designed for classroom interaction.

Short biography for Instructor:

Fred Heintz, CPIM, CIRM

Fred has extensive experience implementing ERP systems and discrete applications, from a simple one plant manufacturing implementations to a global single instance SAP ERP program. He has worked on over twenty successful installations, with software for Distribution as well as the Manufacturing Planning side of the business.

His ability to guide the organization through the changes required by new software is enhanced by the ability to quickly grasp those business processes crucial to the company's success. Changing processes, while keeping the business core competencies, is crucial to maximizing the effectiveness of any software implementation.

Fred guides organizations skillfully through the cultural and organizational changes required to implement new information systems.

Fred has a Bachelor of Science degree in Finance from Central Connecticut State University where he graduated with high honors. He has achieved both CPIM and CIRM certification, is an instructor and active member of the Hartford Chapter of APICS.
